About Me

As a Front-end Developer with expertise in HTML, CSS, JavaScript, and React.js, I'm passionate about creating responsive and engaging web experiences. With a keen eye for design and a commitment to delivering top-notch user interfaces, I thrive in crafting digital solutions that blend aesthetics and functionality seamlessly. Let's connect and collaborate to bring your web projects to life.

Work Experience

Web Developer Intern

Bharat intern

○ Portfolio

- I designed and developed a dynamic online portfolio using HTML, CSS, and JavaScript, combining creativity with technical skills. This portfolio not only showcases my work but also reflects my proficiency in front-end web development.
- The HTML structure provides a clean and organized layout, while CSS adds aesthetic appeal and responsiveness, ensuring an optimal user experience across devices. JavaScript was incorporated to enhance interactivity, including features such as smooth scrolling and interactive elements.
- The result is a visually engaging and user-friendly platform that effectively presents my projects and skills, leaving a lasting impression on visitors. This project demonstrates my ability to create impactful web solutions and my commitment to staying current with web development trends.

○ Netflix clone

- I designed and developed a simplified Netflix clone using a combination of HTML, CSS, and JavaScript. This project emulates the basic functionality and aesthetics of the popular streaming platform, allowing users to browse and view a curated library of movie and TV show titles.
- The user interface is intuitive and responsive, offering features such as clickable movie posters for more information, a dynamic navigation menu, and a functional search bar.
- JavaScript was utilized to enable smooth interactions, such as modal pop-ups for video previews and basic user authentication for personalized recommendations. This Netflix clone project showcases my front-end web development skills, including design principles, responsive layout, and interactivity.
